

Want to win a tennis game?

Don't be chaste, be cautious and be lucky to serve first.

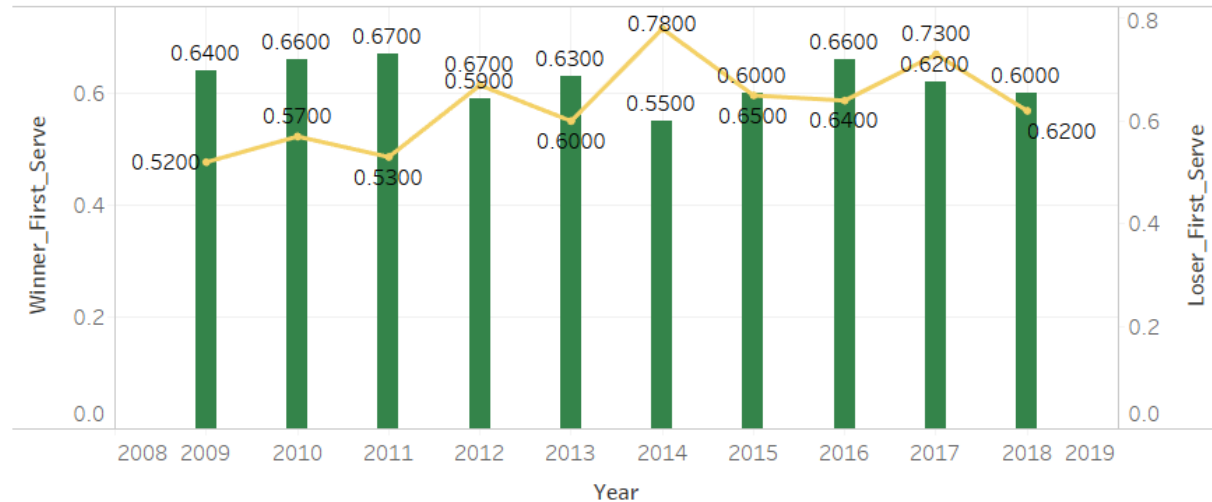

Serve Speed by Win Status

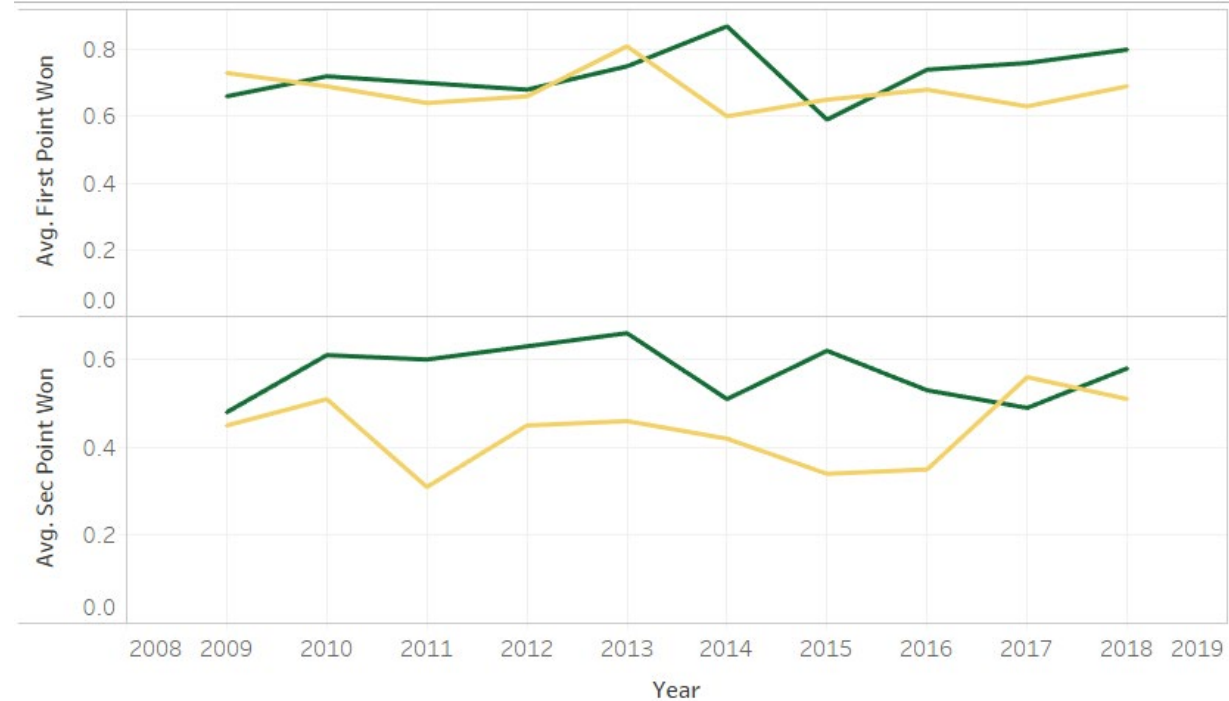

Above graph shows that average fast serve speed of winner is lower than losers

First Serve % by Win State

Above graph shows that first serve percentage of winners is more than losers

First and Second Points Won

Above graph shows the first and second points won by winners and losers. First point is won by players with less margin. But players get more cautious on their second point and win by vast margin.

Conclusion:

Players who are cautious of the game and maintain speed lower than their opponent often win the game.
